Total Cases: 277

**Assist— The coroner may be called when a person dies in Natrona County, but the origin of the investigation is from another county. Patients may be transferred into a medical facility from other counties but die in Natrona County. In those cases, the Natrona County Coroner may assist the coroner of jurisdiction, but not conduct the investigation.

**Backward Cases are coroner cases that were not reported to the coroner at the time of death. By the time the notification of death is reported to the coroner, the final disposition has already been determined and the body has either been cremated or buried. A paper investigation is then completed by the coroner to be able to rule a cause and manner of death for completion of the death certificate.
